

AI Course - Practical Assignments

Assignment 1: Prompt Engineering

Objective

Learn how to write effective prompts and understand how prompt structure affects AI output.

Task

Choose **one topic** such as:

- Education
- Business
- Healthcare
- Technology
- Social Media
- Career Guidance

Create prompts using the following prompt-engineering concepts:

1. **Clarity**
2. **Context**
3. **Role**
4. **Output Format**
5. **Tone**
6. **Constraints**

Part A - Basic vs Improved Prompt

Write one simple prompt.

Then improve the same prompt by adding:

- Role
- Context
- Clear task
- Output format
- Tone
- Constraints

Part B - Three Prompt Techniques

Create examples using:

- Zero-shot prompting

- Few-shot prompting
- Step-by-step reasoning / structured reasoning

Part C – Testing

Run your prompts in any AI tool such as ChatGPT, Gemini, or Claude.

Compare the results and explain:

- Which prompt produced the best result?
- What changed after improving the prompt?
- Which instructions had the biggest effect?

Submission

Submit:

- Original prompt
 - Improved prompt
 - Three prompt-technique examples
 - AI outputs
 - A short comparison of approximately **200–300 words**
-
